CDI 16B SERIES

operating pressure16 bardrain capacity45 l/hconnections1/2"operating temp. range1,5 to 65 °C

APPLICATIONS

- air compressor (piston or screw)
- after-cooler
- cyclone condensate separator
- pressure vessel/air tank
- air dryerair filter

ELECTRONIC CONDENSATE DRAIN

DESCRIPTION

CDi16B is designed for fully automatic discharging of condensate or any other non-aggressive fluid from compressed air system. The unit can be installed as external drain on any application specified below.

Condensate accumulates in the collecting vessel and when the level is high enough condensate is being discharged from the system without any air losses. Electronic control system has a precise capacitive level sensor through which is controlled solenoid piston valve.

A special self-cleaning piston valve prevents disturbing the function of CDi16B caused by debris. CDi16B is also equipped with operation alarm, led indicator and test button.

TECHNICAL DATA					
Voltage	115 VAC		115 V ± 10 %		
	230 VAC		230 V ± 10 %		
Power	115 VAC		24 VA		
	230 VAC		24 VA		
Frequency			50-60 Hz		
Operating pressure			0-16 bar(g) (0 - 232 psi)		
Drain capacity (at 7 bar/101 psi)			45 l/h (0,0235 scfm)		
Operating temperature range			1,5 - 65 °C	(35-149 °F)	
Inlet connection			R 1	/2"	
Outlet connection		R 1/8''			
Power interface			3 × 0,75 mm²		
Protection class			IP54		
Mass [kg]			0,95		
Dimensions A × B × C [mm]		115 × 85 × 165

Compressor motor power [kW]			up to 90		

Please take the relevant climate zone into account when dimensioning yours specific ECD-B drain series application:

а	Northern Europe, Canada, Northern USA, Central Asia		
b	Central and Southern Europe, Central America		
с	South East Asian coastal regions, Oceania, Amazon and Congo regions
